SMART SIGNAGE III

For this situation, we are using Airtame not as a wireless screen sharing device, but to turn our display into an info screen.
Airtame's cloud subscription enables you to **create screens with branded overlays, customized images, or room schedules** to make the space your own.

Use it to share your screen from any device, or to inform or engage your audience or... combine both to get the most out of inactive meeting room screens!

NEC	43" diagonal ME Series - digital signage	InTouch 6276242
AIRTAME	AIRTAME Wireless HDMI Adapter for Enterprises	InTouch 5797668
VISION	VFM-F20 floorstand portable & height adjustable	InTouch 4818836
